RISKS

The value of an investment in the Fund can go down as well as up and possible loss of principal is a risk of investing. Investments in international and emerging market securities may involve risks such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility and limited regulation. Fixed income investments are subject to additional risks, including, but not limited to, interest rate, credit and inflation risks. The Fund may invest in the following: derivatives which can be volatile and affect Fund performance; high yield bonds (junk bonds) which can subject the Fund to substantial risk of loss; and structured investments which can change the risk or return, or replicate the risk or return of an underlying asset. The Fund invests in holdings denominated in foreign currencies, and is exposed to the risk that the value of the foreign currency will increase or decrease. These and other risks associated with investing in the Fund can be found in the Prospectus.

MATTHEWS ASIA

Matthews Asia believes in the long-term growth of Asia, one of the world's fastest-growing regions. Since 1991, we have focused our efforts and expertise in these countries, investing through a variety of market environments. Matthews Asia employs a bottomup, fundamental investment philosophy with a focus on long-term investment performance. As of 30 June 2018, Matthews Asia had US\$33.9 billion in assets under management.

[†] All returns over 1 year are annualised

- Modified duration measures the percent change in value of the fixed income portion of the portfolio in response to a 1% change in interest rates. In a multi-currency denominated portfolio with sensitivities to different interest rate regimes, modified duration will not accurately reflect the change in value of the overall portfolio from a change in any one interest rate regime. Source: FactSet Research Systems, Bloomberg. For detailed modified duration exposures by currency, please see the next page.
- Yield is yield to worst, which is the lowest potential yield that can be received on a bond without the issuer actually defaulting. Yield to worst is for the bond-only portion of the portfolio and is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions, including prepayment, call or sinking fund, are used by the issuer. It does not represent the yield that an investor should expect to receive.

All performance quoted represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate with market conditions so that when redeemed, shares may be worth more or less than the original cost. Current performance may be lower or higher than performance shown. Investors investing in Funds denominated in non-local currency should be aware of the risk of currency exchange fluctuations that may cause a loss of principal.

Performance details provided are based on a NAV-to-NAV basis with any dividends reinvested, and are net of management fees and other expenses. Source: Brown Brothers Harriman (Luxembourg) S.C.A.

The J.P. Morgan Asia Credit Index (JACI) tracks the total return performance of the Asia fixed-rate dollar bond market. JACI is a market cap-weighted index comprising sovereign, quasi-sovereign and corporate bonds and is partitioned by country, sector and credit rating. JACI includes bonds from the following countries: China, Hong Kong, India, Indonesia, Korea, Philippines, Thailand and Singapore. Index is for comparative purposes only it is not possible to invest directly in an index. Source: Brown Brothers Harriman (Luxembourg) S.C.A., Index data from J.P. Morgan.

- Holdings may combine more than one security from the same issuer and related depository receipts.
- Percentage values in data are rounded to the nearest tenth of one percent; the values may not sum to 100% due to rounding. Percentage values may be derived from different data sources and may not be consistent with other Fund literature.
- Cash and Other Assets may include the mark-to-market value of forward currency exchange contracts and certain derivative instruments.
- Credit quality is provided for the underlying bond holdings of the Fund and does not include common equities, cash and other assets and percentage values will not total 100%. Credit quality rating symbols reflect that of S&P and generally credit ratings range from AAA (highest) to D (lowest). When ratings from Moody's, S&P and Fitch are available for a bond in the Fund, the middle rating of the three is used. When two ratings are available, the lowest rating is used. When only one rating is provided, that one is used. Foreign government bonds without a specific rating are assigned the country rating provided by one of the three agencies. Securities that are not rated by any one of the three agencies are reflected as such.
